

Is **your procurement team** struggling with timely validation of the product labels from **multiple suppliers**?

Swipe to see →

One of the leading semiconductor fabrication companies was facing the same issue. **Here's how we solved it!**

SWIPE >>

Each supplier had a different standard and tool/software for barcode labeling. This resulted in barcode readability issues for their traceability team when the raw materials arrived.

SWIPE >>

With our simple **low-code solution, BarGen**, the client could reduce the time in handling label standards by 67%.

SWIPE >>

BarGen is a **plug-and-play software** that **enables** smart conversion of user inputs to barcodes using APIs.

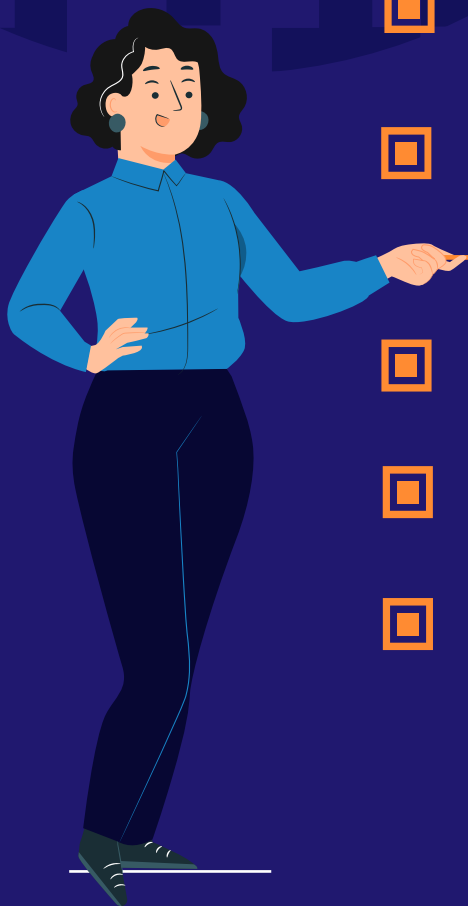

They **distributed** BarGen to all their suppliers, who now follow **centralized barcode labelling** standards, making it easy for them to validate suppliers' lot.
